DESCRIPTION OF SERVICES

The Program for Assertive Community Treatment (PACT) is a mobile psychiatric rehabilitation program designed to help people with mental illness live independently in the community. PACT is a 24-hour, seven-day-a-week service designed to respond to the needs of clients. PACT takes a multi-disciplinary approach working to manage the clients' broad range of needs. A goal of PACT is to teach clients to monitor and control their psychiatric symptoms. PACT emphasizes vocational rehabilitation for clients, helping them to explore the world of work and ultimately gain competitive employment.
