DESCRIPTION OF SERVICES

Peter and Paul House is a 12-bed facility for male clients ages 12-18; the average length of stay is 6-12 months.

The therapeutic group home program is dedicated to working with youth in the context of their nuclear families and other support networks in the community. It provides the structure and redirection that will help youth function more successfully upon their return home to the family or some alternative community program. Services include individual, group, family, and milieu therapy in conjunction with a behavior modification program, which focuses on positive reinforcements, and natural, logical consequences.
